

ClassCharts Improver - For Schools

An Implementation and Security Guide for teachers and school admins

hi.opticflowstudios+ccteacher@gmail.com

jamesttheakston2@gmail.com

Overview

ClassCharts Improver is a popular browser extension used by students across the globe. ClassCharts Improver for Educators (ClassCharts Improver for Teachers) is a browser extension that adds the same features students love, but on the teacher version of ClassCharts. The teacher version is built-in to the main extension, therefore there is no need to install two separate extensions.

Features

- Improved Icons across the application
- Optional AI - off by default
- Dark Mode
- + Many more coming soon

Why does your school need it?

For late night marking, school report writing, or simply if they are in low-light classrooms, teachers need a way to reduce eye strain, reduce blue-light exposure, and save battery on their devices. Dark mode ensures that all of this happens. The Improved Icons ensure ClassCharts is a platform that your teachers **want** to keep coming back to everyday.

Who made the extension?

ClassCharts Improver is made by a student and I wanted to make the platform more enjoyable and accessible for students and teachers. You can check me out on other platforms and my official website at <https://jamestheakston.pages.dev>

Regular Development

The extension is regularly maintained, ensuring the extension keeps up-to-date with all the newest changes on the platform, and to fix any bugs.

Security & Privacy

Because security and privacy are important.

Security and privacy work hand-in-hand. Even though ClassCharts Improver seems like a non-crucial part of your everyday life, it doesn't mean that it shouldn't be secure. Security is my number 1 priority.

Security is something you don't need to worry about. **If** you choose to send your data to the cloud (because I think data collection should be optional) the data is stored using Supabase infrastructure, which provides enterprise-grade security certifications including SOC 2 Type II and ISO 27001. If you choose to send your data to the cloud, it ensures your settings on the extension (e.g. if dark mode is turned on) remains the same on other devices where the extension is installed. If you have further questions then please do not hesitate to contact me by the email addresses on the cover page.

Privacy is not something to worry about either. The main platform (student version) takes a privacy-first approach and the teacher edition will be nothing different. If you want to find out about how our current student platform works from a privacy perspective, reach out to me or read our privacy policy at <https://classchartsimprover.pages.dev/privacy>.

Permissions

ClassCharts Improver only requests permissions necessary to:

- Modify the appearance of the ClassCharts interface
- Store user preferences
- Synchronise optional settings between devices

The extension does not:

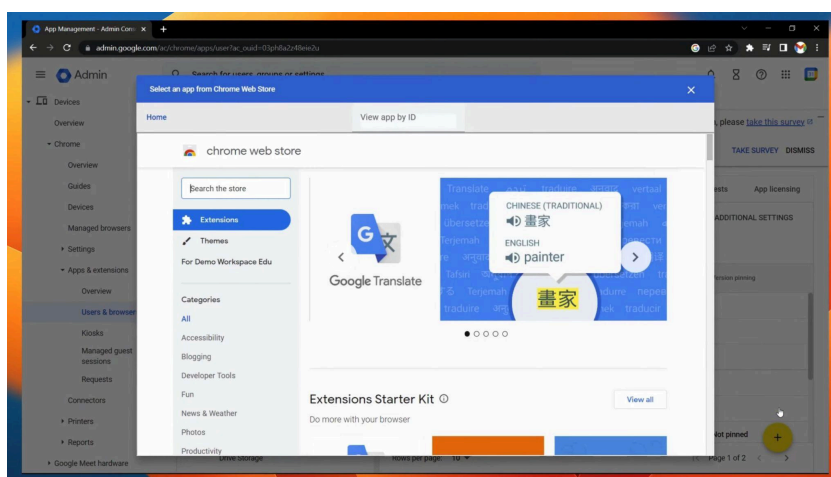

- Read passwords
- Access unrelated websites
- Sell personal data

For more information, feel free to contact me.

Implementation

The teacher version is built-in to the main extension, therefore there is no need to install two separate extensions. Implementation depends on how your school manages the computers. If the browser (Chrome, Edge, and other Chromium-based browsers) is managed by Google Admin Console, this makes the process easy. If your browser is not managed by Google Admin Console, please contact me.

1. Login to Google Admin Console (<https://admin.google.com>)
2. Navigate to Menu > Devices > Chrome > Apps & extensions.
3. Click on Users & browsers to apply the setting to users, or Managed guest sessions for shared computers.
4. Select the Organizational Unit (OU) on the left (e.g., "Students" or "Staff").
5. Click the + (plus) button at the bottom right and choose "Add Chrome app or extension by ID" or "Chrome web store".
6. Search for ClassCharts Improver and click "Select" at the top.

7. On the panel that appears on the right, change the Installation policy to **Force install**. You can also change some more settings from here if you wish to do so.
8. Done!

Firefox Support

ClassCharts Improver dropped support for Firefox on Feb 23, 2026. You could use an older version of the extension, although it isn't recommended, as there may be security issues or bugs in the application that have arisen since that version was released.

To do so, go to <https://addons.mozilla.org/en-US/firefox/addon/classchartsimprover/>, scroll down until you see "More information". Within that section, look for the link "See all versions" and click it.
